PATENT APPLICATION

5   entitled: SINGLE USE DEVICE FOR TRANSMITTING INFORMATION

in the name   of:

10   assigned to: PROMEPLA

ABSTRACT OF THE DISCLOSURE

15       This invention relates to a single use device for transmitting information,  
allowing either identification of a circulating product, or management of the  
dispensing/aspiration of a product, by means of a product dispensing machine,  
in a patient, characterized in that it integrates a transponder emitting said  
information by radio-frequencies.

20       The device is advantageously either a medical tool or a tube connecting  
said machine to a patient.
